What is the effectiveness of reporting systems in promoting learning in healthcare?

*Sehgal A. British journal of hospital medicine. 2024; 85(4), 1–9.

Evaluation of the design and structure of electronic medication labels to improve patient health knowledge and safety: a systematic review

*Sehgal A. British journal of hospital medicine. 2024; 85(4), 1–9.

Key Points

This study aims to review comparative evaluation studies on how medication label design can be optimized to improve patient understanding of medications & patient safety.

It also discusses possible requirements for a new medication e-label standard to enhance the dissemination of tailored content via web and mobile apps.

It revealed the importance of standardizing label content and display structure to incorporate into print and electronic formats.
